

# NATURAL ALTERNATIVE TO **ANTICOCCIDIAL** DRUGS & VACCINES

# PHYLOX<sup>®</sup>

Phylox<sup>®</sup> is a non-pharmaceutical anticoccidial. The feed additive contains a proprietary blend of bioactive phytochemicals that work together to damage *Eimeria* cell structure and function while strengthening intestinal integrity and boosting immunity.

  
CAN BE USED IN A  
**NO ANTIBIOTICS**  
..... **EVER** .....  
PRODUCTION SYSTEM

## PHYLOX HAS MULTIPLE MODES-OF-ACTION

Affects *Eimeria* Lifecycle At Multiple Points

**01** Interrupts *Eimeria* Life Cycle and Prevents Oocyst Sporulation

**02** Disrupts Cell Membrane of Protozoa

Additional Modes Of Action Directly Benefit The Animal

**03** Energizes Host Intestinal Cells

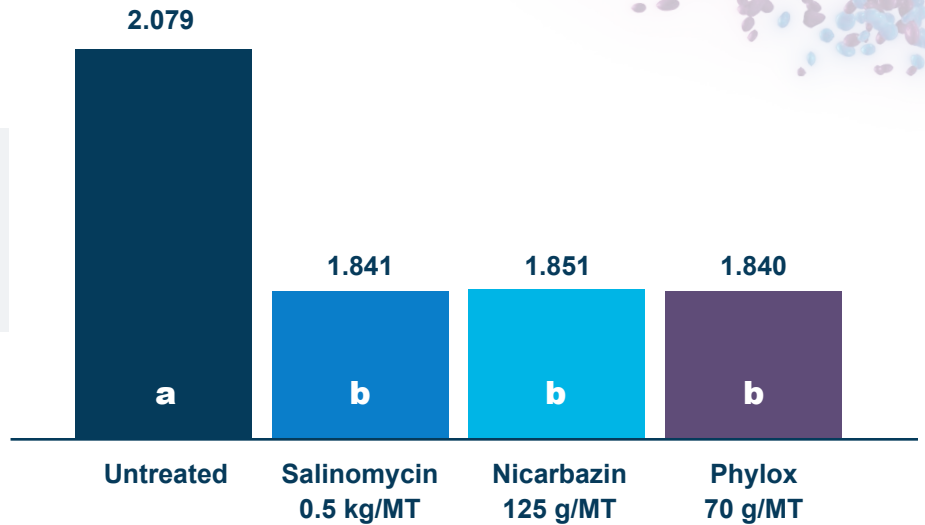

**04** Improves Immune Function

Validated by multiple contract research trials, Phylox® provided equivalent performance when compared to commercially available anticoccidials including chemicals and ionophores under a cocci challenge.
